

HIGHLIGHTS

FROM THE 2019 ANNUAL REPORT

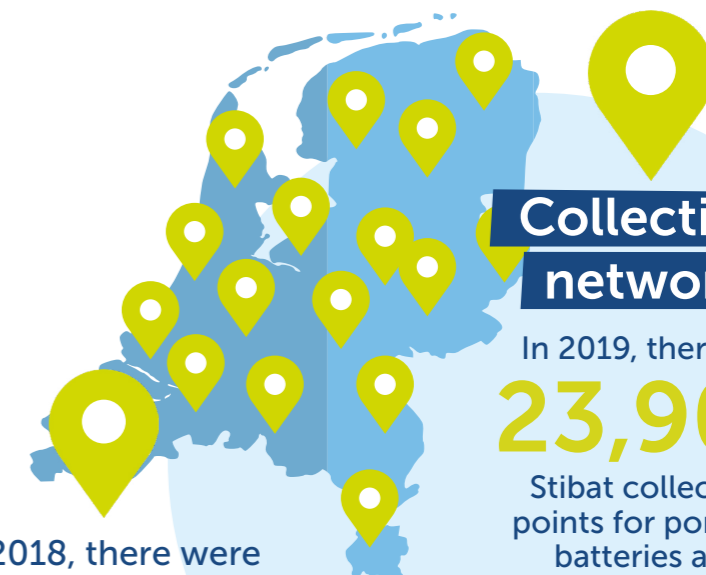

Recycling result

The realised recycling percentage of portable batteries (including slugs).

Stichting Batterijen offers a collective solution for producers (manufacturers and importers) of portable and industrial batteries. On behalf of Stichting Batterijen, Stibat takes care of the fulfilment of the statutory manufacturer responsibility. On 31 December 2019, 1,102 producers of batteries and accumulators were affiliated with Stichting Batterijen through an accession agreement.

Collection network

In 2019, there are **23,907**

Stibat collection points for portable batteries and accumulators.

In 2018, there were **24,216** Stibat collection points

In 2017, there were **24,528**

Stibat has at least one collection point per 2,000 inhabitants in each municipality. We do not just ensure proper distribution, but also provide safe, sustainable and recognisable collection points.
